The Environment

SMR ensures a broadly characterized environment by its facilities, classrooms, school based health supports and disciplinary policies and practices. We set the stage for the external factors that effect students by developing their analytical and problem solving skills.

"The highest education is that which does not merely gives us information but makes our life in harmony with all existence."

Architecture

The building has a unique modern architecture set up in 6.5 acres of land. It is located in a pollution free environment away from the hustle and bustle of the city. Further the classrooms are installed with air conditioners as well as projectors. Moreover, our school building provides a unique learning environment for the sustainable development.

Curriculum

SMR follows the pattern prescribed by CBSE. Our curriculum has been designed in such a way that make the child think out of the box and takes him away from the rote learning. The lessons are linked seamlessly to life outside the classroom, thereby helping the children to develop their thinking skills.
